1. Project Update

Nowted project was finished at January and has fulfilled the List of Requirement that was created. To complete the project according to the design on codedesign.dev, I will add a Folder feature where users can group notes into a folder that has been created.

2. Nowted Product Roadmap

After considering my knowledge and experience, I have a planned timeline for the creation of the product as outlined below:

Acticity	Week 1							Week 2						
	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Backend														
Frontend														
Testing														

Product Roadmap

3. Most VIable Product

1. User can create a new folder
2. User can put in a note into folder
3. User can move a note into another folder
4. User can delete folder
5. Notes that are not in any folder will go into a folder called "Other"

4. Mockup
